Supporting our nation's civil aeronautics and space programs

Search for Apollo Documentary Participants

DON'T MISS OUR UPCOMING
APRIL LUNCHEON AT KSC

Our speaker on April 18th will be Dr. Gioia Massa, Principal Investigator, International Space Station plant growth program. [CLICK HERE](#) to see her bio.

She will discuss her goal of giving future inhabitants of Mars a better quality of life and her passion of enabling NASA's grand challenge of space colonization as humanity becomes a space-fairing civilization.

To register visit www.nafl.com after April 1 or email Bev Merrilees

Good afternoon! I am passing along a message sent this past week from Adrienne Gerard, a producer for *Contact Light* working on a video documentary on the build-up for the Apollo Program. She would appreciate contacts from NASA and our contractors as follows:

I am currently in pre-production on a documentary pertaining to the Apollo space program, and we are looking for Florida residents who worked on the construction of the Apollo infrastructure (the VAB, gantries, Block House etc) at Cape Canaveral between the years of 1963-1972, either as a NASA employee or as a private contractor.

Starting in April, her company will be making calls to interested parties here in Florida to determine schedules for interviews and on site video interviews with those identified for this project. Please pass this along and respond directly to:
Adrienne Gerard, Producer
